

Image Optimization for Web – Instructions

PURPOSE

This guide defines mandatory requirements for preparing images for web content. All images used on websites, in presentations, or for digital publishing must be optimized according to these specifications before upload.

Standardized image and file sizes ensure that web pages load quickly, storage is used efficiently, and image quality remains consistently high.

TARGET SPECIFICATIONS

- Width: 1920 pixels
- Format: JPEG
- File size: between 200 and 400 KB
- Color profile: sRGB
- Aspect ratio: keep unchanged (e.g. 3:2 or 4:3)
