

Drone Photography – Instructions

PURPOSE

These photos are used to advertise the property online — for both rentals and sales.

The shoot's goal is to highlight the property's best features and convey an overall impression of the surroundings and the experience the customer can expect when renting or buying.

IMPORTANT NOTES

- Contact the customer if weather conditions are unsuitable for drone flights and propose a new date.
- If you have already paid for a flight permit and the shoot is cancelled, send the invoice to office@propus.ch for reimbursement.
- No costs apply for the customer in case of weather-related cancellation.
- Verify the shoot address and clarify whether a flight permit is required.
- Pay particular attention to permits in sensitive areas: nature reserves, airfields, military zones, railway facilities, construction sites, and police stations.

EQUIPMENT & SETTINGS

Drone settings

- 3 exposure brackets: -2 / 0 / +2 (if available)
- Aperture: f/4 – f/5.6 (if available)
- ISO: 100–200
- AWB (Auto White Balance)
- Format: RAW

DELIVERABLES

- Cover image: main photo for the online listing, the property's best feature or selling point
- Property: front, back, left and right side, top view
- At least 1 photo per side from different altitudes
- Surroundings: 1–2 shots (or more on request), e.g. garden, entrance, landscape, mountains, lakes, forests, cityscapes
- Pick the most advantageous angles, avoid repetition

UPLOAD & PRE-SELECTION

Upload all images, but mark the best ones for pre-selection.

Packages

- 4 photos → 12 RAW files
- 8 photos → 24 RAW files
- 10 photos → 30 RAW files

Two upload categories

- Required shots: at least 1 high-quality image per angle
- Additional shots: supplementary angles or altitudes

⚠ Incomplete required shots or excessive repetition may result in unpaid reshoots.

DO'S & DON'TS – BEFORE THE SHOOT

- Remove trash bins, small objects, and — if possible — vehicles
- Ask the contact person to remove larger objects
- Choose a position where you yourself are not visible in the frame
- If pets are on site, ask for them to be kept indoors

⚠ No people may be visible in the photos.

DO'S & DON'TS – AFTER THE SHOOT

- Review the shots and ensure all required images are present
- Delete blurry or duplicate photos before upload
- Use the comment field for customer requests or notes

⚠ Upload the shots by the evening of the shoot at the latest.
